The prior art of record fails to teach determining positional relationships among objects in a database as cited in independent claims 1, 20 and 21. Specifically the prior art of record does not teach the following combined features, defining a plurality of tiles in a spatial index in a database, a primary filter process for comparing tiles and a secondary filter for comparing objects to determine positional relationships of objects in a database as cited in the claims. The primary filter is a process operable to compare tiles of a first object with tiles of a second object to determine intersections and boundaries; while the secondary filter is a process that compares objects to determine a

positional relationship. The prior art does not teach this process as cited in independent claim 1, 20 and 21.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
